Frozen Semen Shipment Expense Addendum for Canada - 2010

As of January 26, 2009 an import permit is required for semen shipped from the United States to Canada. ***The consignee in Canada must apply for an import permit and provide a copy to Select Breeders Southwest, Inc.*** Our office will complete a health certificate which must be endorsed by the USDA. This process can take up to a 10 working days to complete.

Federal Express' policies and fees concerning packages being shipped between the United States and Canada do not fall within the fees and policies for domestic shipments within the United States, which are listed on our standard Shipment Option & Fees. Therefore, Select Breeders Southwest, Inc. has been obligated to adjust shipping protocol and fees to accommodate their policies.

The fees to ship frozen semen from the U.S. to Canada are as follows:

- ◆ \$500 This includes:
 - Coordinate with recipient to obtain import permit
 - Preparation of the health certificate
 - Sending the health certificate to and from the USDA
 - Endorsement by the USDA
 - Tank loading/instructions/handling fee
 - Tank lease
 - 1-way Fed.X priority overnight delivery
 - The commercial invoice
- ◆ Section 8b of the airbill – Payment for duties and taxes – will be marked to bill to sender (SBSW)
- ◆ When SBSW receives the bill from FedX for the duties and taxes for the shipment, that amount plus a minimal office processing fee will be charged to the credit card that was provided for the shipment expenses.
- ◆ The client will be responsible for the expenses to return the tank to SBSW.

Canada requires that we provide a **value of the semen** for the Value For Customs part of the airbill as well as the commercial invoice, so ***please include that on your shipment request form.***
(The shipment fee may be adjusted for values over \$1500.00)
